

K-12 FOOD & NUTRITION CONSULTING

The space between *compliant, producible & eaten.*

Registered Dietitian · 18 years in K-12 child nutrition**130+**

school districts partnered with

\$0.40

saved per meal while raising participation

1,000+

buildings on menu software she rolled out

\$50M+

in annual district budgets managed

Most school food problems live in the gap between what the **USDA requires**, what a **kitchen or factory can produce**, and what **students will actually eat**. After nearly two decades leading menu standards, regional operations, and a company-wide software rollout, that gap is exactly where I work — on both sides of the lunch tray.

Who I help

FOR MANUFACTURERS & SUPPLIERS**Win school business with products that move.**

I've been the buyer deciding which products make the menu. I help you build items that get chosen — and eaten.

- Product & recipe R&D against real student preferences
- Sugar/sodium reformulation that survives the line
- Audit-ready compliance documentation
- The operator's-eye view your sales team lacks

FOR SCHOOL DISTRICTS**Menus that are compliant, affordable & packed.**

The exact work I've delivered for 130+ districts — fitting every puzzle piece together at once.

- Cost-effective, high-participation menu development
- State audit & quality-assurance readiness
- New meal-program launches (BIC, à la carte)
- Menu & production software selection

Capabilities

01**Menu Development**

Compliant menus that cut cost without losing students at the line.

02**Product & Recipe R&D**

Items built to meet standards and win on the tray.

03**Audits & QA**

Documentation and systems that hold up under state review.

04**Software Selection**

Menu, production & inventory platforms — chosen and rolled out.

05**Program Launches**

New partnerships and meal programs, working from day one.

06**Advisory**

Fractional nutrition-and-operations leadership.
